

ABOUT ME

RF Optimizer & Data Analyst bridging technical network operations with advanced data analytics and automation. Demonstrates a strong track record in resolving complex network QoS challenges, leading strategic research, development initiatives, and engineering custom Python/SQL tools to automate KPI monitoring. *Passionate, resilient practitioner with a proven track record of mastering advanced Data Science, ML, and MLOps frameworks alongside demanding full-time operational roles. Skilled in bridging domain-specific engineering with data-driven decision automation.*

CONTACT

Date of birth : Nov-1994
Gender : Male
Availability : One month notice
Nationality : Burmese (Myanmar)
Preferred position : Data Entry, Data Analyst and ML Engineer

EDUCATION

TU – HMAWBI (MYANMAR) (2011 – 2016)

- Bachelor of Engineering (Electronics) [GPA - 3.95/5.0] - Qualified for M.E

HARD SKILLS

- Python, SQL, R
- Power BI, LookerStudio, Excel, G-Sheet,...
- Time series analysis, predictive modelling
- Data cleaning, ELT/ETL, Data mining...
- Git, Jupyter Notebook, Excel macros...

ACCOMPLISHMENTS

- 2026: [IBM ML Professional Certificate](#)
- 2025: [TensorFlow & Keras Bootcamp](#)
- 2024: [IBM DS Professional Certificate](#)
- 2024: [Applied DS Professional Certificate](#)

RECOMMENDATION

- [Propel Network Myanmar](#)

HTET AUNG LYNN

(DATA ANALYST | DEPUTY MANAGER | RF OPTIMIZER) ([view my portfolio website](#))

WhatsApp : +6593426721

⇒ Based in Singapore | Eligible for S-Pass or Employment-Pass sponsorship

WORK EXPERIENCES

Auxiliary Police Officer | Data Scientist

AETOS (Singapore) | Nov 2024 – Present

RESPONSIBILITIES

- Scope & Dual Focus:** Execute full-time public security operations, while independently building end-to-end Machine Learning pipelines and cloud applications during off-shift hours.
- End-to-End ML Pipelines:** Train, and evaluate Regression, Classification, and Clustering models—executing complete workflows across EDA, feature engineering, statistical analysis, hyperparameter tuning, data ingestion, data transformation, data validation and model training ETL ML data pipeline.
- Cloud & Web Deployment:** Package and deploy predictive ML models as containerized web applications using Docker, Flask, Streamlit, Render, DagsHub and AWS Cloud.
- Advanced Technical Mastery:** Expanding specialization into MLOps, Deep Learning (TensorFlow/Keras), and NLP through hands-on project development and continuous upskilling.
- Portfolio Projects:** <https://github.com/htetaunglynn94/Portfolio-Projects.git>

Data Analyst

Frontiir (Myanmar) | Apr 2022 – Sep 2024

RESPONSIBILITIES

- FTTH Database & Database Optimization:** Diagnosed active FTTH network architecture and resolved critical capacity bottlenecks—reducing database usage by 37% and earning an accelerated probation completion (4 months vs. 6-month standard).
- Operational Analytics & Leadership:** Served as the data analytical lead/supervisor for Loan Operations, managing cross-departmental requirements, project timelines, and stakeholder alignment to improve operational workflows.
- Predictive Modelling & EDA:** Performed end-to-end exploratory data analysis (EDA), feature engineering, statistical modelling, and correlation analysis on real-time datasets using Python and SQL to evaluate risk and forecast performance.
- BI Dashboarding & Automated Reporting:** Designed and maintained interactive KPI dashboards in Google Looker Studio, and Excel, automating daily/weekly reporting processes to accelerate executive decision-making.
- Cross-Functional Collaboration:** Partnered with Data Engineering, IT, Marketing, and Business Strategy teams to implement data-driven solutions, optimize data quality, and support product initiatives.

LANGUAGES

- Burmese (Native)
- English (Fluent)

STRONG POINTS

- Analytical Mindset
- Problem-Solving
- Adaptability
- Resourcefulness
- Self-Motivation
- Attention to Detail
- Cross-Functional Collaboration
- Continuous Upskilling

ACHIEVEMENTS HISTORY

- Identified FTTH network anomalies and operational pain points, earning recognition from the Team Manager and CTO and leading to assignment as Loan Operation Project Supervisor.
- In FY2023, Contributed to a **26.16%** increase in company revenue, as part of the team.
- Developed automated optimization tools to reduce team workload and improve operational efficiency.
- Recognized as a key contributor to team performance and business outcomes.
- Developed web-application to record on-ground data for officers.

CORE COMPETENCIES

- **Languages & Core:** Python, SQL, R, Excel VBA
- **Data Science & ML:** TensorFlow, Keras, Scikit-learn, Time-Series Forecasting, Predictive Modelling, Clustering, EDA
- **Engineering & Cloud:** Docker, Flask, Streamlit, AWS, Git, SQLite, MySQL, MLFlow, DagsHub, IBM DB2
- **BI & Domain Tools:** Power BI, Looker Studio, Tableau, TEMS, Atoll Simulation, MapInfo, Spectrum Net

WORK EXPERIENCES

• **Deputy Manager | Radio Network Performance Analytics & Optimizer**
MPT Mobile Operator (Myanmar) | Apr 2019 – Mar 2022

RESPONSIBILITIES

- **Process Automation:** Developed automated KPI reporting and monitoring solutions using Python, SQL, Excel VBA, and Power BI, reducing manual reporting effort by 47% and improving operational efficiency.
- **Data-Driven Optimization:** Led regional KPI analysis and optimization initiatives, delivering actionable insights, performance reviews, and capacity forecasts to support management decision-making.
- **Network Performance Optimization:** Optimized coverage, quality, capacity, interference, and network performance across 2G, 3G, and 4G networks to improve service quality and user experience.
- **Technical Problem Solving:** Identified and resolved low throughput, interference, sleeping cells, worst-performing cells, and network congestion through data-driven analysis and radio parameter optimization.
- **Cross-Functional Leadership:** Collaborated with engineering teams and technology vendors on high-priority LTE initiatives, including MOCN, Massive MIMO, and IP Clock migration.
- **Project & Operations Management:** Managed internal projects, coordinated cross-functional teams, and delivered weekly regional performance reports and operational insights to management.
- **Data Automation & Engineering:** Built an automated pipeline to collect, transform, and store daily transmission data in SQLite, creating a foundation for analytics and automated reporting.

• **OSS Engineer | Radio Network Optimizer (2G/ 3G/ 4G)**
China-Com Service (Myanmar) | Oct 2016 – Mar 2019

RESPONSIBILITIES as OSS Engineer

- **Regional Analytics:** Analyzed regional network performance and prepared KPI reports.
- **Data Analysis:** Performed time-series and traffic analysis for performance and revenue planning.
- **Automation:** Built Excel VBA KPI dashboards and reporting tools, improving team efficiency by 71%.
- **Optimization:** Supported parameter tuning and KPI optimization during network rollouts and upgrades.
- **Coordination:** Coordinated field operations, vendors, and engineering teams.

RESPONSIBILITIES as Radio Network Optimization Engineer

- **Performance Analysis:** Analyzed drive-test data to identify coverage, signal, and capacity issues.
- **KPI Analysis:** Monitored KPIs and performed root-cause analysis and technical troubleshooting.
- **Operational Analytics:** Tracked field operations and drive-test progress for network optimization.
- **Team Management:** Managed field engineers and drive-test assignments.
- **Stakeholder Management:** Coordinated client issues, escalations, and field requirements.
